STERILE CATHETER LUBRICANT GEL

BRAND: CATHEJELL

MANUFACTURER: PHARMAZEUTISCHE FABRIK MONTAVIT

Description

Cathejell with Lidocaine is a sterile, colorless, water-soluble, anesthetic lubricant gel designed to facilitate the insertion of catheters and other instruments into the urethra. Single-dose, autoclave-sterilized container.

1. **Lidocaine:** Acts as a local anesthetic to minimize discomfort during catheterization and urethral instrumentation.
2. **Chlorhexidine:** Provides broad-spectrum antibacterial action against gram-positive and gram-negative bacteria. Not effective against acid-resistant bacteria, spores, fungi, or viruses. At the presented concentration, acts as a prophylactic agent against iatrogenic infections of the upper urethra and bladder.
3. **Lubricant base:** Water-soluble, colorless, and transparent gel formulation that ensures smooth instrument insertion while maintaining compatibility with urethral tissue.

Indications

Indicated for urethral instillation prior to the insertion of a urinary catheter or other urological instruments. Suitable for use in permanent urinary catheterization procedures.

Features and Benefits

Single-dose sterile container eliminates cross-contamination risk. Autoclave-sterilized formulation ensures product integrity. Water-soluble, transparent, and anesthetic gel provides effective lubrication and patient comfort during urological procedures.

Reference

- 400195

Composition

- Each 100 grams contain: 2 g of Lidocaine Hydrochloride and 0.05 g of Chlorhexidine Dihydrochloride.

Presentation

- Box of 25 accordion syringes of 12.5 g each, for urethral instillation.
